

Name:Saurabh Tripathi

Prn. No. : 045

```
Q.1) int arr[]={1,2,2,3,3,4,4,4,5,5,5,5}
alter array in such way that the element which occur most times will print first.
sample output-arr[]={5,5,5,5,5,4,4,4,4,2,2,3,3,1};

[17]: mylist = [1,2,2,3,3,4,4,4,5,5,5,5]
      freq = {}
      for i in mylist:
          freq[i] = freq.get(i, 0) + 1

      sorted_list = sorted(mylist, key=lambda x: (-freq[x], x))
      print("list1:", sorted_list)

      list1: [5, 5, 5, 5, 5, 4, 4, 4, 4, 2, 2, 3, 3, 1]

Q.2) Write a Python program to find if a given string starts with a given character using
Lambda.

[18]: starts_with = lambda string, char: string.startswith(char)
      s = "Saurabh"
      ch = "S"
      result = starts_with(s, ch)
      print(result)

      True
```

```
Q.3) Write a Python program to filter a given list whether the values in the list are having
length of 6 using Lambda

[23]: words = ["Saurabh", "Sachin", "Prajakta", "Anurag", "Sumit", "Lavanya"]
      result = list(filter(lambda x: len(x) == 6, words))
      print(result)

      ['Sachin', 'Anurag']

Q.4) Write a Python program to create Fibonacci series upto "n" using Lambda

[20]: fib = lambda n: (lambda f, n: f(f, n))(
      lambda f, n: n if n <= 1 else f(f, n-1) + f(f, n-2),
      n
      )
      n = 10
      for i in range(n):
          print(fib(i), end=" ")

      0 1 1 2 3 5 8 13 21 34
```
